

# THE NEW CHARLIE'S ARK

## AUDIO BOOK

Charming, enchanting and thought-provoking stories for children.  
The perfect shared parent-child experience.

**'Charlie's Ark' is about a five year old boy and his toy-box, in the shape of an ark, in which he keeps his many animals. They all come to life when he says the magic spell!**

Each story has a moral such as thinking of others and less of oneself. Stories all about giving, caring, loving and sharing that will keep children enthralled for ages. They tell of how the "magic" began, of Charlie's relationship with the animals that live in his Ark toy box, how and why Charlie had an Ark and many other stories.

You never see Charlie's face, or that of his sister Sally, which adds to the air of mystery, and helps each child identify further with the characters.

At the end of every story is a song to finish off each story in a perfect way, written and performed by Patrick Adam

The CD Album comes with a booklet of all eight stories beautifully illustrated by Adam Pescott.

**Created by world-renowned illustrator Mike Payne, well known for 'Tatty Teddy / Me To You Bears', Charlie's Ark is set to be another major global success.**
